

Boards may consist of:

- Photo's of site
- Aerial View of site
- Photo's of surrounding context (though a slide show of these will be presented by DR Manager ahead of the presentation)
- Area Map with site outlined
- Site Plan
- Site Analysis – Movement analysis, historical analysis
- Elevations, cross sections
- Sketch Designs / 3D images

NB:

- ♣ Please ensure a North arrow is present on all relevant plans / maps
- ♣ Fewer Large images are preferred to many small images and the less text the better

Presenters should remember to discuss the following during their presentation:

- How the project came to be where it is now
- The site including:
 - Access (existing and proposed)
 - Use (existing and proposed)
 - environmental factors and proposed environmental strategies
 - design (existing and proposed)
 - community factors – user group issues, community engagement etc
- The site context within the wider environment – village, town, city or region
- The site constraints

You will have 20 minutes maximum to present, but any issues not covered in the presentation should be drawn out through the Q&A session
